Agamograph

To complete the optical illusion on the front, accordion fold the paper along each vertical line.

Watch how the image changes when you view it from one side, then the other. You just made an agamograph!

"I went to my library to check out a book on antigravity ... and now I can't put it down!"

How do you get a baby astronaut to sleep?

You rocket

I'm sometimes full, but I never overflow. What am I?

The moon

"What a shame. I keep pressing the space bar on my computer, but I'm still here on Earth!"

DID YOU KNOW?

- ✓ There are more stars in the sky than grains of sand on Earth!
- ✓ The moon isn't round; it's egg-shaped.
